

Health Innovations & Interventions Research

Project Title	Health Innovations & Interventions Research
Project Summary	Use your research and analytical skills to identify, review, and analyze existing resources that compile innovations and interventions programs, technologies, solutions, and products in the field of health care.
Country	United States
Agency	National Library of Medicine
DoS Office	N/A
Post	N/A
Section	N/A
Number of Interns	1

Project Description

Seeking: Graduate-level student interested in health innovations and interventions. You enjoy researching to expand your knowledge and inform others. You are a strong writer. You have a general knowledge of, or the research skills to find, key health agencies, organizations, and research literature on the topic.

Your research and analysis will inform the role our office can play in interacting with these resources. You will collect and consolidate publicly available resources, such as AHRQ Health Care Innovations Exchange and CHMI's Innovation Database, in a manner so that it can be easily accessed and amended in the future. A review and analysis of the resources will provide recommendations for further analysis and answer questions such as

- Who are the stakeholders
- What is the level of sustainability of the resources
- Is there content overlap
- What data is available for reuse, and more!

Desired Skills Interests

Additional Information

Research generated from this project would provide a great opportunity for publishing!

- Access to WebEx, GoogleChat, or Skype
- Access to a good internet connection
- Access to Google Drive
- Graduate-level student: ideally in health services research, public policy, health informatics, public health, health policy, or library and information science.
- Detail-oriented, organized

Language Requirements

None
